

A decorative graphic on the left side of the slide consisting of white and light blue lines that resemble a circuit board or a stylized tree. The lines are vertical and horizontal, with small circles at the ends, creating a complex, branching pattern.

FACTS ABOUT CATS AND DOGS

CHRISTIAN OCASIO
JOSH MCSWAIN
ANGELO NUNEZ

The background is a blue gradient with faint concentric circles. White circuit-like lines with circular nodes are positioned in the corners: top-left, top-right, bottom-left, and bottom-right.

ELEVATOR PITCH

CONCEPT

- Invite the user to learn facts about dog and cat breeds
 - Also, allow the user to provide their own facts about dogs and cats
- Motivation for development? To Complete Project 1
- User story –
 - We began with the concept of a website that would help people adopt pets. The database information we found and research caused us to switch the focus to a per education and sharing site.
 - We feel like this website has a lot of potential and hopefully we can add the adopt a pet option later.

PROCESS

- Technologies used

- All coding was done in VSCode
 - HTML, CSS, JS we are all familiar with these codes
 - We choose to use Skeleton instead of bootstrap
 - Skeleton is very similar to bootstrap, so the learning curve was brief

- Breakdown of tasks and roles

- Josh was tasked with writing the html, CSS, and skeleton
- Christian was tasked with configuring the two APIs and styling
 - We both shared duties for content, README, and presentation

- Challenges — APIs, finding time to meet, learning Skeleton

- Successes — meeting the project requirements

DIRECTIONS FOR FUTURE DEVELOPMENT

- We have talked about adding the adopt a pet option to this website.
 - Our vision was to provide the user with a wide range of facts about cats and dogs. This could inspire them to find out more about a breed and move toward pet adoption.
 - We would then add a form that the user could use to search for their breed using a search feature that is linked to an active pet adoption website and API service.
